The Permanent Exhibition

National Museum of Korea

Amazingly, it has already been twelve years since the National Museum of Korea reopened at its current location in Yongsan in October 2005. To take full advantage of this new and improved space, the museum has recently focused on expanding and enhancing its collection. Thus, we now proudly present this catalogue, which reflects some of the recent changes to our permanent exhibitions. A total of 11,493 works are currently displayed in the Permanent Exhibition Hall of the National Museum of Korea, which occupies three floors and a total area of 19,000 m². On each of the three floors, the galleries are divided into two sections. The first floor includes the galleries of Prehistory and Ancient History, and Medieval and Early Modern History. Arranged chronologically, the first-floor galleries enable visitors to explore nearly the full spectrum of Korean history, from the Paleolithic Period to the Korean Empire (1897-1910). The second floor includes the Calligraphy and Painting galleries, as well as Donated Works. The second-floor galleries showcase many masterpieces of calligraphy, painting, and Buddhist painting, along with a wide variety of cultural artifacts that numerous benefactors have generously donated to the museum over the years. Finally, on the third floor, visitors will find the galleries of Sculpture and Crafts, featuring Buddhist sculptures, metal crafts, and ceramics, as well as Asian Art, which features priceless artifacts from India, Southeast Asia, Central Asia, China, and Japan.

Earth Fire Soul

The Masterpieces of Korean Ceramics

National Museum of Korea

This English catalog was created for the special exhibition Earth, Fire, and Soul - The Masterpieces of Korean Ceramics held at the Grand Palais of France from April 27 through June 20 of 2016 and at the State Hermitage Museum of Russia from July 29 through November 6 of 2016. The touring exhibition was designed to provide a unique opportunity to extensively explore both old and contemporary Korean porcelain art. This catalog lists many masterpieces carefully selected from the porcelain collections of the National Museum of Korea, a representative museum in Korea, including national treasures and other notable works inspired by Korean artists working in many parts of the world. I wish that this catalog may help you appreciate the artistry and unique beauty of the Korean porcelain culture, which has developed and changed over centuries on the foundation of a cultural heritage of making porcelain with earth and fire.

Contemporary Music in East Asia

Hee Sook Oh, Christian Christian Utz

"The Music of "Our Times": An Overview

How might the recent contemporary music of East Asia be described?

The 21st century is marked by an age of global culture in which East Asian countries are becoming increasingly interconnected. Recognizing the need for an integrative analysis of the state of East Asian contemporary music, music scholars from Korea, China, Japan, the United States, and Germany came together to write this book.

Korea, China, Taiwan and Japan find common ground in their acceptance of Western music, which became integrated with the distinct historical and cultural characteristics of each country and consequently produced unique signatures in the music culture of each region. This book investigates how contemporaneous music that share similar histories combined with the musical, socio-cultural, and ethnic particularities of each country to form diverse music worlds. In addition, the book analyzes not only how such music worlds appear but their predicted trajectories as well. In the discussions, the works of representative contemporary music composers of Korea, Japan, and China, such as Byungki Hwang, Unsuk Chin, Toshio Hosokawa and Tan Dun, are examined. Such analyses are expected to shed light on the general trends in East Asian contemporary music and place them within a historical context. "

Contemporary Gayageum Notation for Performers and Composers

Ji-young Yi

Contemporary Gayageum Notation for Performers and Composers provides an introduction to the history of the instrument, its many forms, and performance genres. The text also provides information on special techniques and features essential for composing modern pieces for gayageum. To help elucidate the world of gayageum performance techniques, the book includes two hundred and thirty sample notations selected from traditional repertoires and seventy-seven compositions by forty-six composers, and these sample notations are accompanied by video demonstrations.

The examples cover comprehensively all techniques for gayageum performance, from the most traditional to the extremely modern. Together, the notation and video further enable the reader to grasp the performance techniques and the particularities of the notation. I hope composers who engage in writing new compositions for the gayageum can use the book and accompanying materials to better grasp the performance techniques and aesthetics of gayageum performance. Gayageum performers, as well, can also learn much about contemporary performance techniques through the pages of this book.

Chasing Possibilities

A 16 year old's record of a journey embracing all people, a journey of creating and sharing, a journey of miracles.

Joongbin Oh

This book is a story of young traveler who goes to live life with the locals in a third world countries with only soccer ball and a violin in hands. Joongbin Oh, the writer of this book, starting with a backpacking trip to Turkey with his mom-She is famous essayist in Korea- when he was only 3 years old. After then, he has traveled to numerous third world countries including Myanmar, Syria and Uganda, amassing a travel record that could match and exceed any adult's. When he turned 12 years old, he encountered an orphanage named 'Permata Hati' in Ubud, Indonesia. As he came to be a part of Permata Hati, he organized a volunteering program called Voluntraveling, enabling tourists to volunteer and donate. After he organized this program, so far over 300 Koreans have participated in this program. And Permata Hati's children grew day by day through new learning from volunteers. At last, Permata Hati's children organized music band, won a prize in a music contest. In addition to music, Permata Hati's children learned a lot from volunteers such as English, Korean, making picture book, computer, math, etc. Through these learning, Permata Hati's children have grown up to be self-confident children. He suggests that if we sharing little bits we have, it is possible a big miracles occurs. Also he tells about the importance of sharing with sustainability.

Introduction to International Development Cooperation

Introduction to International Development Cooperation

Changrok Soh, Kyungyon Moon

The objectives of this book are threefold. It is essential to first understand why the issues of poverty and foreign aid have emerged as a global agenda and how and why these relationships between the rich and the poor have developed. In this sense, the first step is to trace the evolution of foreign aid from its beginnings in the aftermath of World War II to better understand the historical contours of donor and recipient relationships. Second, we seek to assess global efforts made by the international community during the 50-year history of development aid and identify challenges for the Post- 2015 era. The international community has improved aid practices but there are still many obstacles to achieving global goals and eradicating global poverty. Last but not least, we recognize that the boundaries of development aid have expanded to include a wide range of complex issues and practices as well as the participation by multiple actors. We also emphasize the importance of constructing a global governance framework and aid architecture that encourages cooperative networking among multiple actors for increased aid effectiveness in the future.

Linguistic Expeditions

Ho-min Sohn

Sohn is a linguist of great versatility, who has done extensive work in two fields of areal linguistics: (i) Korean and Japanese, and (ii) Micronesian languages (Ulithian, Woleaian, Kwara"ae, and others). To the languages in both of these groups he has applied methods and theories of phonological, morphological, syntactic, semantic, and historical-comparative analysis. Not only does he cover these various "bread-and-butter" areas with equal skill, but he also manifests an adept approach to sociolinguistic issues and matters of language pedagogy. In treating various comparative problems, he further shows sensitive understanding of semantic and pragmatic values in English. By and large Sohn's work will be of general appeal both to theoretical linguists and to non-theory-oriented students of Korean (or to some extent Japanese), because "most analyses and accompanying discussions ... are predominantly data-based, without extensive involvement in the matters of abstract theoretical polemics."

Topics in Korean Language and Linguistics

Ho-min Sohn

This book is an anthology of selected papers on Korean language and linguistics that Ho-min Sohn, Professor of Korean linguistics and Director of the Korean Language Flagship Center at the University of Hawaii at Manoa (UHM) and President of the Korean Language Education and Research Center, Inc., have written for academic conferences, journals, and/or chapters in edited books during the past twenty odd years.

A total of thirty-four papers were selected to encompass topics on diverse aspects of Korean language and linguistics. These papers are topically classified into four major categories: (a) linguistic and pedagogical overview, (b) structural dynamism, (c) sociolinguistic and pragmatic issues, and (d) teaching Korean as a foreign language.

Perceiving Syllables and Contrasts

Second Language Learning Perspectives

Byung-jin Lim

My aim in this book is not to redefine 'Standard Korean' but rather to delineate which speakers the current study is dealing with, and clarify how they will be sampled. As shown in above definitions of Standard Korean, social class and geographical distribution seem to be determining factors for the Standard language. Furthermore, since the current study is primarily concerned with the speech of young people in the Seoul area, age should be another important factor. So, I will focus on the speech of members of the younger generation who were born in or after 1985 and have grown up in the Seoul area until the age of twenty. Geographical distribution in Korea is important in that it seems to be highly correlated with economic development and distribution of wealth, which results in higher education levels in the Seoul area.

Decoding speech requires people to map onto stored network of information, and thus they are able to construct interpretations of the speakers' intentions. This book investigates the process of segmentation (or syllabification), through which a continuous speech stream in a language is broken into meaningful units such that the information carried in spoken utterances or represented in orthography is relayed to language users.

Korean Hedges in Spoken Discourse

Sociopragmatic and Pragmalinguistic Perspectives

Yeonhee Yoon

As summarized in the preface of the book, Dr. Yoon's research, the first of its kind in Korean linguistics, makes several important descriptive and theoretical contributions to general socio-pragmatic studies. For instance, Dr. Yoon discovered that Korean hedges, functioning as interactive strategies, are used more frequently in two-party than many-party conversations and more frequently in personal than impersonal topics. Her study also reveals that hedges are used as both positive and negative politeness strategies and that social situational factors are more influential in affecting hedge use than social structural factors such as gender, age, region, or occupation.

Rise of Korean Language Programs in U.S. Institute of Higher Education

A Narrative History

Hye-Sook Wang

Through the stories presented in this book, we learn that Korean language (and Korean studies) programs in American higher institutions have gone through significant transformations in the past several decades. Much has been accomplished in terms of not only quantity but also quality, in spite of a wide array of challenges, both pedagogical and non-pedagogical alike. Korea's strong economy and improved global image, generous and strategic funding support from Korean government agencies, and the recent "Hallyu" wave have all worked favorably for the development of Korean programs. At the same time, enthusiastic support of many students, dedication of faculty in the Korean programs, vision of school administrators, and emphasis on foreign language education by the American government were other factors that contributed to the current state of Korean programs today.

Korean

Ho-min Sohn

This volume was originally published by the Routledge in 1994 as one of the Series planned by Bernard Comrie. The Series covers those languages such as Abkhaz, Kobon, Mangarayi, Tamil, West Greenlandic, Japanese, Rumanian, Modern Greek, Amele, Basque, Gulf Arabic, Kannada, Finnish, Catalan, Punjabi, Maori, and Korean, representing diverse language typologies and families. Under the expert leadership of Comrie, a descriptive guideline is prepared and provided for standardized and parallel description of those select languages in the Series.

This particular volume has been sold out immediately after its publication due to highest demand among readers including researchers, instructors, and students of Korean language and linguistics. Its standardized description on grammatical characteristics, concepts and terminologies of Korean language from a perspective of the Korean as one of major world languages serves as a key factor positioning this volume as a must-have reference grammar book for Korean language.

The Possibility of Peace in the Korean Peninsula

Preparing, Building, and Guaranteeing Inter-Korean Peace

Hyug Baeg Im

This book will address the problems in conflict resolution and peace-building in the Korean Peninsula. Peace building in the Korean Peninsula has been exceptionally difficult because concerned actors could not find feasible solutions to the complex problems surrounding conflict prevention, conflict resolution and peace building in the Korean Peninsula such as the North Korean nuclear issues, inter-Korean confrontation, and the rising competition of hegemony in East Asia between the US and China.

Bridging the Technology Gap

Historical Perspectives on Modern Asia

Youngsoo Bae, Buhm Soon Park

What made it possible for Asian countries to have such a turn-around in technology? A body of literature seeks to answer this question by examining cultural aspects (e.g., Asian values), innovation systems (e.g., government agencies and policies), geopolitical situations (e.g., the Cold War context), or charismatic leadership in business and policymaking areas (e.g., the founders of Sony and Samsung). Yet no one has taken a serious look into the nature of the technology gap per se. What is the technology gap? What exactly do we mean by “bridging” this gap? Is there a universal yardstick to measure and rank the national capacity for technological productivity? I think that the term ‘gap’ is a useful yet problematic metaphor, for a gap connotes a space or distance between two objects. Is the technology gap something that can be filled with more stuff or be connected with a bridge?

How Shall We Study East Asia?

Hiroshi Miyajima, Walraven Boudewijn

The Academy of East Asian Studies in Sungkyunkwan University aims to focus on East Asia as a methodological approach, rather than simply treating the region as a topic of research. In order to clarify the meaning of “East Asia as method” I would like to discuss some examples in this preface. In approaching ‘East Asia as a method’ the following two points should be kept in mind. First, the issues examined within the framework of the new East Asian studies should have a universal meaning going beyond the confines of East Asia. Second, the new approach should be informed by a critical reassessment of the conventional framework of East Asian studies.

The first and foremost task in approaching East Asia as method is to conduct a fundamental review of the conventional binary division of world history into modern and pre-modern. In East Asian studies, it has been a convention to take the mid-nineteenth century as the dividing point between the two eras.

Many recent studies on East Asia have revealed that too many subjects on East Asian history and society cannot be appropriately understood by applying the modern versus pre-modern scheme. Another serious problem caused by the dichotomy of pre-modern and modern is that it has created partitions not only in the fields of research but also more generally in the system of learning and knowledge.

North Korean Modern History: A Sourcebook Volume I

Dae-sook Suh, Wan Bom Lee

This source book on North Korean Modern History is published in English to help scholars to research on North Korea. In most cases even the most basic documents relating to North Korea's history are available only in the Korean language. North Korean authorities occasionally issue English versions of selected documents, but these translations are markedly inferior in quality—some are in atrocious English.

The purpose of this book is to collect and present basic documents and improve our understanding of North Korea's political and social traditions. This is not an effort to either praise or denigrate North Korea's accomplishments or failures. It is an introduction of the basic documents that will assist our analysis and understanding of the country.

Social Welfare in Korea: A Sourcebook Volume I

Jin-young Moon, Jae-jin Yang

This book offers a comprehensive documentation of the Korean welfare state since the independence in 1945. Focusing on the major social welfare programs such as the National Pension, Medical Insurance, Industrial Accident Compensation Insurance, Employment Insurance, Free Child Care, Long-term Care Insurance for the Elderly, and National Basic Livelihood Security, this book provides a compelling and detailed explanation of the birth, settlement, and development of the Korean welfare state. It will serve as the standard text on the history of welfare policy in Korean. This book will appeal to those interested in the Korean welfare state as well as those interested in the Korean society as a whole.

The Life and Rituals of the Nanai People

Juwon Kim, Dongho Ko

The Nanai language, one of the Manchu-Tungusic languages of the so-called Altaic language family, is seriously endangered with only a few fluent native speakers, as well as with no intergenerational language transmission, making its documentation an extremely urgent undertaking for linguists.

In this book we present the transcriptions, linguistic annotations, and translations of a fluent Nanai speaker's spontaneous narratives on the life cycle of the Nanai people, which are divided into the following four topics: Childhood Education and Child Rearing rituals, Birth rituals, Wedding rituals, and Funeral rituals. In addition, we provide an English translation of the abridged Russian version of the materials, as well as an alphabetical list of lexical and grammatical forms with their meanings.

The goal of our research is, on the one hand, to help understand the cultural practices of the Nanai people and their language, and on the other hand, to contribute to the revitalization of the Nanai language.

Poetry of Ch'oe Ch'iwŏn

Christina Han, Wing S. Chu

This book is a translation and study of the poetry of the ninth-century Korean literary icon Ch'oe Ch'iwŏn (b. 854), who has long been celebrated as the founding father of classical literature in Korea. Ch'oe's literary legacy was characterized by his ability to cross both cultural and ideological boundaries.

Confucian Thought in Korea

A Study Based on the Cardinal Principles of Confucianism

Sa-soon Youn

In the conclusion of this book, I anticipate that the theory of four beginnings and seven feelings, the status of human nature and the thing's nature relative to each other, and Neo-Confucian simjeukri (心即理, Mind is ri) might contribute greatly to the development of 'the philosophy of mind'. I hope my expectation may be borne out, and that this book may play a part in strengthening Korean Confucian thought.

Korean Philosophy

Sources and Interpretations

Sa-soon Youn

Korea is a country with a history of thousands of years, and is rich with cultural heritage. It has its own unique language and alphabet, history of thought, art, sciences, and customs, among which its language is the core element establishing the identity of Korean culture. As Korea had its own language, it could create its unique alphabet, learning, and art. However, considering that a given language is the expression of a distinctive history of thought, we should realize that the fundamental factor in the constitution of Korean culture is 'Korean thought'. It is in this context that the importance of Korean thought is emphasized.

Korean thought, belonging to the cultural bloc of East Asia, assimilated advanced religions such as Confucianism, Buddhism, and Taoism from that bloc. Through the creative and critical assimilation of such religions, Korean thought gained not only its unique characteristics but also universal qualities it shared with other Eastern countries.

The reason why we regard Confucianism, Buddhism, and Taoism as advanced religions is that they are mainly based on rational thought, though they retain a few shamanist elements. It may generally be said that belief or faith based on dogma is a religion, but that the method and content induced by rational thought belong to the realm of philosophy. In this sense the traditional philosophy of Korea can be said to be the result of the synthesis, intensification, and modification of the thought propagated by these religions, through the rational capacities of Korean scholars. This book is the compilation of the research work in, and interpretations of 'the traditional philosophy of Korea' that arose from this meeting of cultures.

Mongering North Korean Democracy for Inter-Korean Peace

Democratization in North Korea and Inter-Korean Peace

Hyug Baeg Im, Jae H. Ku

We have written this book on the possibility of inter-Korean peace through North Korean democratization in a milieu of both pessimism and wishful thinking regarding the future of the North Korean dictatorial regime. This book will not be calculating and predicting the probability of North Korean regime collapse or survival. Rather this book plans to examine vague, unsorted, and undigested hopes for democracy in North Korea and inter-Korean peace and from them find possibilities that may be realized in the near future.

Cyclostationary EOF Analysis

Theory and Applications

Kwang-Yul Kim

This book discusses the concept and applications of cyclostationary EOF (CSEOF) analysis developed by the author. The concept of this innovative space-time analysis technique is fully expounded in comparison with the conventional data analysis techniques. Many scientific examples included in the textbook demonstrate the importance and benefit of analyzing space-time evolutions in order to fully understand physical processes in a physical system. Various applications of scientific interests are developed and implemented based on the CSEOF techniques in the book; these applications are new and original. The book contains more than 100 exercise problems, pedagogical as well as research examples, all of which are fully solved in a separate exercise eBook. This is an advanced book on statistical climatology and an excellent self-teaching tool, which is intended for graduate students and researchers in earth sciences and statistics.

Dynamics of a Rice Cultivating Village in Korea, 1977-2015

Joo-hee Kim

This book is a longitudinal ethnographic report on Sanjin-ri, a typical Korean rice cultivating village located in Gyeonggi Province. Based on eight different field studies spanning four decades (1977-2015), the book aims to portray how residents of the village made strategic shifts in response to broader socio-economic changes surrounding them during a period of rapid economic growth, and to theoretically analyze the major factors responsible for such turns. The book deals with changes in geographical conditions of the village, population and household composition, migration patterns, economic activities related to farming mechanization, and family survival strategies. It also traces modified aspects of religious and ritual lives in such areas as shamanic rituals and funeral and ancestor worship rites, as well as changing patterns of kin relations and social networks of men and women.

Korean Society an Introduction

Andrew Eungi Kim

South Korea (henceforth Korea) is a country that has experienced rapid social changes, beginning with economic development in just a generation or two. Economic transformation invariably caused widespread social and political changes as well. Korean society has been profoundly reshaped in the late twentieth and early twenty-first centuries, with many of these changes still ongoing. In the political sphere, civic groups are exerting increasing influences on the political processes of the nation's politics. Socially, one of the most important changes is the rapid aging of the population, which has been brought on by the increase in life expectancy and the record-low fertility rate. Another significant social change has been the making of multicultural Korea. The phenomenon of Hallyu or the Korean Wave, which refers to the rise in the popularity of Korean popular culture in many parts of the world, has also been a significant change for the country.

These are some of the most important cultural, social and political trends and issues facing contemporary Korea. While this book does not claim to provide a comprehensive overview of Korean society, it has collected some of the best articles on the most important aspects of contemporary Korea.

Beyond Risk Society

Ulrich Beck and the Korean Debate

Sang-Jin Han

This book is aimed at developing Ulrich Beck's idea of second modernity and cosmopolitan sociology, particularly his vision of critical theory. For this purpose, the book presents his lectures and presentations during his visit to Seoul, Korea in 2008 and in 2014 and examines the interaction between Beck (as well as Elisabeth Beck-Gernsheim) and the Korean scholars. The key question is how to grasp complex risks that citizens face as unintended consequences of rapid change and where the normative energy comes from in order to move 'beyond risk society.' Though the main focus is on Korea, the arguments can cover well other countries like China where compressed modernity has brought about not only remarkable economic growth but also complex risk society.

Health Politics in Korea

The Political Dynamics of Healthcare Reform

Soon-yang Kim

Health Politics in Korea analyzes the political dynamics of South Korea's healthcare reform, through the case study on the debate to inaugurate the single payer system of health insurance, which had been practiced for two decades since the early 1980s. During this period, South Korea had undergone unprecedented political and economic turmoils. Through this book, readers will be able to gain valuable insight into how these turbulences had impacted healthcare reform in a politically and economically transitional country. This book also grants opportunities for readers to compare the different paths taken by South Korea's healthcare reform which reflects the changing dynamics of its political regimes.

The book's key theoretical perspectives are underpinned by the policy network perspective and new institutionalism. This combination allows the book to establish more integrative and stereoscopic analytical framework linking environmental context, institutional constraints, policy network, and policy outputs.

A Quest for East Asian Sociologies

Seung Kuk Kim

Combining theoretical and empirical studies, this book explores the emerging theoretical work that explains East Asian identities while also investigating empirical peculiarities of East Asia. The sociological perspective of this book starts from the recognition that the rise of East Asia does not mean either a negation of the West or an ethnocentrism of the East. Given a hybridized world society and a global cosmopolitanism, the distinction between the East and the West is becoming much more complicated. East Asian sociology in contrast to as well as in continuation of the Western sociology must, therefore, be pluralist and multidimensional. This book tries to illuminate the most crucial sociological issues in East Asia such as East Asian view of globalization and civilization, inequalities and multiculturalism, social movements and risks. As the era of East Asia is manifesting itself an irreversible historical trend, so East Asian sociologies are maturing into a quest for new and better civilizations.

The Social and Psychological Acculturation of North Korean Refugees

Soon-Hyung Yi, Soo-Churl Cho

This is a book on North Korean refugees who entered South Korea since 2004. Experiences of North Korean refugees provide a good example of how an individual interacts at various levels of environment at a time of drastic change in the political-economic regimes and the cultural system. We followed the whole journey of North Korean refugees from their life in North Korea through experiences in China and settlement efforts in South Korea. Using both quantitative and qualitative methods, we investigated their social and psychological adaptation issues and mechanisms from the acculturation perspective. While many experienced severe adjustment problems, some showed positive outcomes. Individual and family resilience was an important factor which facilitated their acculturation and adjustment.

Global Challenges in Asia

New Development Models and Regional Community Building

Hyun-Chin Lim, Wolf Schafer

The present volume is the outcome of this conference held in October 2011. Representing Australia, China, Croatia, Germany, Japan, Korea, New Zealand, Russia, Sweden, Taiwan, UK, and USA, an interdisciplinary group of over fifty scholars discussed some thirty papers and four keynote speeches in Seoul ... The content of the conference is well reflected in the chapters of this book. Most of our authors agree that the influence of Asia is increasing in economy, culture, and many other fields; however, they also notice that this change needs more scrutiny in order to be able to forecast the future of Asia. Bearing this in mind, the authors are surveying different facets of growing Asia in this book

The cooperation among Korea, China, and Japan is vital for the future of Asia and even for the world; however, there are many obstacles to overcome in order to forge a regional community in Northeast Asia. ... To build a regional community, they should pursue a “conjunctive synthesis” (求存同異) and “unity in diversity” (和而不同) through acceptance of intraregional diversity under regional commonness. While fostering a sense of community, they should enhance mutual understanding and trust through expansion of cultural and economic exchanges for cooperation and coexistence (Exposition, 19).

The Korean State, Public Administration, and Development

Past, Present, and Future Challenges

Yong-duck Jung

Many new nation-states emerged immediately after the end of World War II in the mid-20th century. These states respectively pursued their own path toward national development. Their goal was to surpass the Western countries in the speed of their own development. But, in the seventy years that have passed since then, only a very few countries have achieved that goal. In this regard, Republic of Korea fully deserves the global recognition it has received for that remarkable achievement. In the latter part of the 20th century, Korea has successfully completed state-building, industrialization, and democratization.

In considering the national development of the last seventy years and the solutions to the present and future challenges facing Korea, one has to take into account the crucial role played by the state and public administration. In all countries, the state and the bureaucracy as the largest organized entity have the greatest impact on the lives of the people. This is especially true of Korea whose process of institutionalization has led to the creation of a strong state. In this book, the author analyzes the role of the state and public administration in the national development and their own development in performing that role in the last seventy years.

Overcoming Financial Crises

The Korean Experience

In June Kim, Yeongseop Rhee

Korea has often fallen prey to international financialcrises including the Asian crisis, the global financialcrisis, and the Eurozone crisis. The impact of the crises has been profound, and they have fundamentally changed not only the Korean economy but also the whole Korean society. Why is Korea likely to become a victim of a crisis even though its economic fundamentals are sound? Why does Korea tend to be more severely damaged than other countries by a crisis once it occurs, no matter where the crisis originates? Is it due to structural problems of the Korean economy or the international financialmarkets? What should be done for Korea to avoid, prevent and overcome a crisis? This book is an attempt to answer these questions, and comprehensively explains the causes and effects of and policy responses to financialcrises, focusing on the Korean experience.

Menschen Leben Wege

Ein Lesebuch für junge Deutschlerner mit 50 Biographien interessanter Persönlichkeiten aus dem deutschsprachigen Raum

Hee Hyun, Harald Gärber

In vorliegendem Buch finden sich 50 Biografien von interessanten deutschsprachigen Persönlichkeiten aus möglichst vielen znterschiedlichen Bereichen: Erfinder und Wissenschaftler unterschiedlicher Disziplinen, Unternehmer und Manager, Künstler und Sportler, Entertainer und Modedesigner, Politiker und Funktionäre, Sänger und Schriftsteller, Theologen und Kritiker—Beispiele vom 17. Jahrhundert bis zur Gegenwart.

Und darum geht es in diesem Buch: Eine Verbesserung der Deutschkenntnisse über die Lektüre von Biografien, die inhaltlich anregen sollen, in der fremden Sprache zu denken, sich hineinzudenken in eine fremde Welt. Diese fremde Welt wird nur fassbar über die Gesellschaft, ihre Organisation und ihre Struktur. Und die Gesellschaft—das sind die Leute, die Tätigkeiten nachgehen, entweder konform oder abweichend vom gesellschaftlichen Mainstream. Da Abweichungen von der Norm besonders interessant sind, finden sich unter unseren Persönlichkeiten naturgemäß mehr Ausnahmetalente als Durchschnittsbürger. Bei genauerem Hinsehen entpuppen sich aber auch Genies und Würdenträger als Menschen, als Personen ihrer Zeit und in einem bestimmten gesellschaftlichen Rahmen, der auf sie einwirkt wie auf jeden anderen Menschen auch.

Natural Derivational Phonology

Byung-Gun Lee

Natural Derivational Phonology endeavors to settle the problems to be encountered in Optimality Theory and other perplexing problems. In Natural Derivational Phonology constraints, including constraint pairs, apply singly or multiply to any input (underlying or intermediate) in accordance with the natural ranking of universal ranking principles, bringing forth serial derivation. And evaluation constraints may evaluate their outputs.

Part 1 takes the form of a monograph in which the fundamental principles of Natural Derivational Phonology are established. And part 2 comprises three self-contained papers written within the framework of Natural Derivational Phonology.

The papers in part 2 are designed to be case studies. They demonstrate that Natural Derivational Phonology has survived the rigid testing, solving complex and baffling problems in a natural fashion. As a consequence, the basic tenets of Natural Derivational Phonology established in part 1 have been corroborated.

The Road to the TOP Secondary Batteries

Sonu Jun

Unlike other batteries, the lithium ion battery explodes not only in the abused condition but also in the normal operating condition if energy density is higher than the upper limit. Because of this intrinsic characteristics related to the safety of lithium ion batteries, battery development activities have been focused on the accurate control of safety with improvement of energy capacity. This book deals with how the battery industry has expanded its marketing horizon from portable electronics to power tools to electric vehicles with improvement of the safety features. Seven Japanese battery makers including Sony, Sanyo and Panasonic had dominated the world battery market in 1990s. It was LG Chemical and Samsung SDI that put an end to the dominance of Japanese battery makers. Korean battery makers also played an important role in spreading the battery technology to the world. This book is concerned with how Korean battery makers made an incredible progress in a short period of time.

The battery competition has been limited to Japan, Korea and China, but as the major market is changed from portable electronics to electric vehicles, chances are competition will be diversified by the participation of automotive parts companies and companies like Apple and Google. In actuality, the involvement of companies like Tesla Motors and BYD in the electric vehicle business played a pivotal role in galvanizing the electric vehicle industry. This book will give you a good idea on the intriguing future competition dynamics associated with electric vehicles.

From Dolmen Tombs to Heaven's Gate

Understanding World Heritage in Korea

Yeong Hoon Kim

When we explore the cultural heritage of a particular region, we not only gain its knowledge but are further guided to broader questions as well. For example, we are likely to continue questioning “How are the characteristics of Korean Changdeokgung Palace similar or different from other palaces in near East Asian countries such as China and Japan?” or “What are the unique features of Korean Changdeokgung palace that makes it different from palaces in Western countries?” Thus, I consider that every question can help us to have a more profound and broaden view toward the world and feel the special value in the history of humankind. I expect that such trials ultimately become the passage to every person in the world, not just limited to the studies of certain eras or regions.

The Culture of Arirang

Yeon Gap Kim

Some say that I consider Arirang as a religion, and others say that I worship it. But that is not true. It is only that I maintain passion towards my fundamental goal; that is, my Pathos des Grundziels. Thus, I am participating in what I enjoy as much I enjoy it. From the mid 1980's, I came to understand that 'Arirang is not simple', and from the mid 1990's, I tried to make that notion of 'not-simpleness' more substantial.

What I had earned from this process is faith that started as 'Arirang is not a folk song', which in turn became 'Arirang is not merely a song,' and finally that 'Arirang is an independent genre' and a culture that holds the three spirits of resistance, unity, and co-existence. And also it is shared by both Koreas of South and North, along with oversea Korean residents..... My goal was to generalize this claim through objective data and logical analysis. Therefore, my studies were developed through various perspectives. Such an approach was inevitable as Arirang's frame was that much complicated, which required historical view points, along with that from folk study, evolution theory, and diffusion studies. This is because, without such viewpoints, the meaning of Arirang sung in North Korea and other historical scenes are unintelligible. Of course, I am not claiming that this viewpoint is necessarily adequate or that results from such an approach is the sole answer.

Understanding Korean Art

From the Prehistoric through the Modern Day

Sunpyo Hong

As the world becomes smaller, overseas interest in Korean arts has been on the increase. Korean performing arts and the exhibition of Korea's artifacts have been actively introduced and promoted abroad. However, it is difficult to find overseas academic researchers who specialize in Korean arts and thus contribute to rapid progress in this area through in-depth studies. Overseas research on Korean arts, music and dance has primarily been conducted by Eastern art experts as a subsidiary part of their studies, not by Korean art specialists. Given the current situation in which few English references on Korean arts exist, the publication of a textbook on the art of Korea will assist overseas researchers in expanding their studies and taking more interest in this field. The textbook is equipped with a plethora of images, audio data, drawings and glossaries as well as text, offering basic and specific contents needed to present Korean arts.

Understanding Korean Arts, Ewha's Korean Studies Series for Globalization 4 diachronically explores the arts of Korean seven chapters: Prehistoric Age; Three Kingdoms Period and Unified Silla; Goryeo Dynasty; Early Joseon Period; Late Joseon Period, and; Modern Era and Contemporary Period. Each chapter covers various art genres including fine arts, music and dance to help readers comprehend integrated characteristics of Korean arts and culture through history. It is particularly noteworthy that modern and contemporary art in Korea are discussed in this book, which have not been explored enough in other overseas publications on Korea.

A Light Inside

An Odyssey of Art, Life and Law

Jeannie Suk

The first Asian Woman tenured at Harvard Law School, Guggenheim Fellow, Herbert Jacob Prize Winner, 'Best Lawyers Under 40' by the NAPABA, Jeannie Suk tells her heartfelt story. By telling her old love for Ballet, Piano and reading, she guides us to her passionate life and work and finally to the world "that she wanted to see". She decided to write this book because she was frequently asked to explain the connection between how she grew up and how she works and lives now. What world do we want to see? What is "education" in its true sense? What is "life" where one paves one's own path? Through this clean and elegant memoir, we learn that one's attitude and passion for life is the most important in life. and she suggests that we should be brave as we have freedom to be imperfect. Also she tells about her disciplines of life and work. One of those is "find what you really love to do."

Listen to your boss

I would let you know why you failed in last job interview

Min-woo Jeong

However hard you have prepared for employment, however many job qualifications you have acquired, if you can't pass a job interview, all your efforts come to nothing. In this book general manager Jeong clearly reveals why you failed in last job interview, and what is the secret criteria of job interview, which will make you a winner in the poker game between interviewer and interviewee!

General manger Jeong as the current post holder fully discloses the hidden secrets of job interview. This book extracted only essentials from what he said in his invited lectures for employment, which caused an enthusiastic reaction from the young audience. In Part I he demands that young men preparing for employment should become exactly the ideal type of talented person companies and interviewers want, and in Part II he unveils in an interesting manner the tips for actual job interview and the secret criteria of job interview, which were considered as vague. General manger Jeong currently working vigorously in his own field integrated his own 20-year experience and know-how into this book, so that it can be usefully taken advantage of by not only young job seekers who have not decided on the exact direction of their occupation but also young employees who as new recruits have not settled their position.

Mastering Noon Nopi

The Art & Science of Marketing in Asia

Dae Ryun Chang

How does one approach Marketing in Asia, the fastest growing economic region in the world? That is the key question that is answered in *"Mastering Noon Nopi: The Art & Science of Marketing in Asia."* Noon Nopi is a Korean word which means "Eye Level," but the author uses it more broadly to signify the essence of Marketing. The Noon Nopi concept is used throughout the book to convey how companies need to understand their markets through the lenses of consumers. The author brings nearly 30 years of teaching, research and consulting experience and insight about Marketing into the book. He has taught Marketing in Korea, Finland, Australia, Hong Kong and Singapore. He was also raised as a child of diplomats and lived in many countries. The combined experience therefore allows the author to have a unique global perspective of how the "Eye Level" matching can be achieved. The author offers rich personal accounts and anecdotes to illustrate how one's ability to fine tune his or her "Noon Nopi" can be an asset not just in business but also in life such as in individual branding. Even though the book is focused on Asia, many of the analytical tools offered in *"Noon Nopi"* can be applied to marketing problems anywhere. As an added bonus, the book includes the author's many Harvard Business Review Online opinion pieces as well as a key article and case on Asian Marketing.

North Korea's Cities

Industrial facilities, internal structures and typification

Rainer Dormels

The present study deals with the cities of North Korea and approaches the research topic from three different angles. One of the angles is of a qualitative nature and the remaining two are quantitative. The first approach deals with the facilities of the cities, especially with industrial plants. Therefore, five sources have been investigated separately. The second methodological approach was used to study the structure of the cities of North Korea. The analysis of the data on transformation in the administrative divisions within the cities answers to questions about the extension or reduction of the urban area and the development of centers within the city. This publication offers information about the 27 North Korean cities which either has a useful relevance for the typification of the cities and the elaboration of specific characteristics or can be used for the interpretation and explanation of the results of the quantitative research approaches of the present study. The presentation of the results is divided into two parts. First, the results of the interrelations between the cities (population shares, numbers of factories, etc.) are presented. Second, each of the 27 cities will be granted a separate chapter, where results are presented from all three approaches. In an appendix (in Korean) all the relevant names concerning North Korean industrial companies units are listed.

Enjoy Learning Chinese Characters

Discover their Hidden Meanings

Kun Ho Park & Kyung Yong Kong

Chinese characters are represented as pictograms which are based on the shape of objects. If you feel even slightly disheartened that you will have to memorize each one of them, then do not worry. Just as the English language learning system is based on alphabets (A, B, C, etc.) which are a set of characters that represent the phonemic structure of the language; similarly, Chinese learning has about 250 basic and radical characters. Remember that you can combine these Chinese characters or break them in order to easily read, write and understand them.

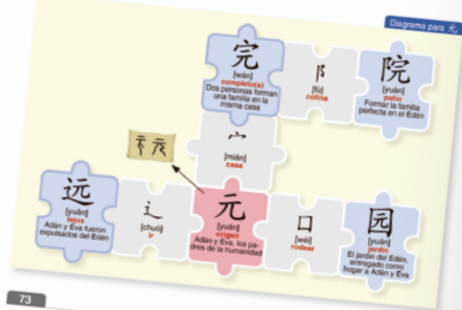

Learning that can be used immediately

By learning how these Chinese characters came to be, you can also learn how adding a certain component changes the meaning. For example, the character “色[sè]” meaning ‘color’ depicts a person(人) on top of another person(巴) in the act of sexual intercourse, which causes one to flush in excitement. Once you know that origin, you will be able to understand why “色[sè]” also means ‘lust.’”

Disfrute Aprendiendo los Caracteres Chinos

Descubra sus Significados Escondidos

Kun Ho Park & Kyung Yong Kong

El prejuicio que tenemos de que los caracteres chinos son jeroglíficos da lugar a la creencia errónea de que hay que memorizar los miles de dibujitos. Pero, al igual que el inglés que tiene sus alfabetos, el chino tiene aproximadamente unos trescientos caracteres básicos. Y a través de la descomposición y recomposición de ellos, se puede leer y escribir y además comprender el significado de miles de caracteres chinos. ¡Aquí usted se encontrará con estos métodos tan sorprendentes!

Una forma de estudio perfecta y práctica Esta forma de estudio, que enseña tanto los principios como el contexto en que se generaron las letras chinas, a la vez, ayuda a comprender la razón por la que se modifica el significado de cada carácter. Por ejemplo, el carácter "色 [sè]" llegó a tener el significado de 'color' a partir de la postura de una persona(ㄣ) encima de otra persona(巴), en una relación sexual, que se excita y se ruboriza. Si conoce este contexto del carácter "色 [sè]" es muy fácil de comprender el porqué tiene además el significado de 'lujuria.'

Enjoy Learning Japanese Kanji

Discover their Hidden Meanings

Kun Ho Park & Kyung Yong Kong

This is a new, highly visual, fun way—using pictures and jigsaw pieces—to learn written Kanji by learning the meaning of 250 characters that combine to form hundreds more. To say that characters are pictograms based on the shape of objects might make you think they must be memorized one by one. But as English has an alphabet, Kanji has about 250 basic and radical characters. Remember that you can combine these characters or use them to break down thousands of others so you can easily read, write and understand them. This book was written to help you understand the origin and usage of 250 Chinese characters. Now you can recall instead of memorize. By learning how these Kanji came to be, you can then also learn how adding a certain component changes the meaning.

How must one learn the basic characters?

This book is written to help you understand the origin and usage of each character. Now you can recall instead of memorize. To remember means to strengthen the synapses which connect your brain cells. Synapses can be strengthened by stimulating the five senses - smell, hearing, taste, vision and touch. When multiple senses are used together, the memory lasts longer. Better results can be achieved when such stimuli is coupled by unforced repetition. One good way of strengthening the synapses is to repeat the same stimulation. This book expands on the basic character by adding parts that give new meaning in a radical form. This means you are exposed to the same basic character multiple times.

SAEROUN HANGEULI YAH0 2 - LEVEL 1

Basic syllable Set

Tae Wook Kang, Bo Kyoung Kim

What is important in early childhood Korean language education is understanding the relationship between words and writing. The <Saeroun Hangeuli Yaho 2> is suitable for the development level of young children and we have constructed the following workbook to provide interesting and meaningful first experience of Hangul learning.

1. Based on the principle of 'Korean alphabet system combination', it provides a more systematic learning opportunity by expanding the learning of Korean children. Children will learn the principles of scientific combination of consonants and vowels, so that they will be able to read even the first words.
2. In the selection of words, the children consisted of familiar words in everyday life. Based on the everyday experience of young children, we select a familiar word and learn new words to broaden the range of Korean language learning.
3. Interesting tales, sayings, songs, rhythms, and words, etc., comprised of interesting stories reflecting the interests and comprehension of infants. It's not only taught by Korean characters, but it's taught in a variety of ways, but it's a diverse set of ways that children are fond of their own interests, and they engage in spontaneous and lasting interests..
4. It emphasizes 'listening' which is the most basic of early childhood language education. Children can focus on the process of changing the sound that they they already heard when they hear, understand and distinguish sound correctly. In <Saeroun Hangeuli Yaho 2>, we provide interesting stories, songs, and accurate pronunciation through each program.

5. During the whole curriculum, we will have have not only Korean language learning but also children who are growing up as a whole. Hangul learning becomes a medium so that infants can develop their self-confidence, become more familiar with others, have fun imagination and creatively express their language.

<Saeroun Hangeuli Yaho 2> aims to provide interesting Hangul learning opportunities suitable for children's development level. The <Saeroun Hangeuli Yaho 2> Workbook maximizes the effectiveness of Hangul learning through broadcasting by connecting and expanding the voluntary interest of children of TV.

If you don't know much when it comes to the Korean language, but you are traveling to Korea soon, don't worry! *Korean Phrasebook For Travelers* will be your passport to getting through that language barrier and making your trip more enjoyable without having to study the language in depth. This book is divided into sections by location and situation so you can easily find the word or expression that you need without wasting much time searching the pages. To help with the pronunciation of Korean, romanizations of Hangeul, the Korean writing system, are written for every word and phrase (the romanizations in this book have been slightly modified from the official romanization system to better suit English speakers). In addition to romanization, illustrations are included to not only help you have a visual representation of a word, but just in case you are having trouble being understood, you can show the other person/people the picture in the book to make things less awkward or frustrating for everyone.

Korean Q&A Sentence Patterns

TalkToMeInKorean

Korean Q&A Sentence Patterns is designed to help you learn how to ask and answer questions in Korean. Obviously there are many ways to ask and answer the same question, so rather than just teaching you one question and one way to answer it, *Korean Q&A Sentence Patterns* gives you the opportunity to learn multiple ways to phrase your questions and your answers.

The questions and answers on *Korean Q&A Sentence Patterns* have been divided into 10 categories, which include Sleeping Habits, Thoughts About Dating, Celebrities, and more! By reading about various topics in Korean, you will learn a little more about Korean culture while increasing your Korean language fluency. Vocabulary translations and grammar points are also provided so that you do not need to look up words in a dictionary or Google anything.

My Weekly Korean Vocabulary Book 1

With 1600+ Everyday Sample Expressions

TalkToMeInKorean

If you are tired of memorizing vocabulary and seeing very little progress, this book offers an alternative way to learn and apply Korean vocabulary words and sentences to your life at whatever level of Korean you are comfortable with so that you actually learn the words rather than simply memorizing. Each day you have one new keyword, and built upon that keyword are 20 additional phrases and sentences that get progressively longer. You can use this book as a 12-week study aid or as a reference book. Stash it in your backpack or purse to use a phrasebook when you're traveling around Korea. It does not matter how you use this book or what your level of Korean is as long as you know how to read Hangeul! Whether you are a beginner or an advanced Korean learner, everyone can benefit from using the *My Weekly Korean Vocabulary* book.

Become a Hangeul Master

Learn to Read and Write Korean Characters

TalkToMeInKorean

Have you ever struggled to read the titles of your favorite K-dramas because of the fancy font? Do you sometimes wonder what Korean handwriting says because you can't entirely make out all the letters? Do you just want to learn to read and write Hangeul better? After studying with this book, you too will be a Hangeul Master! We cover all the Hangeul letters in detail and give you tips on how to easily read Korean handwriting or fonts.

This book has all the essentials to help you learn Hangeul, including a history of Hangeul, pronunciation and the stroke order of the 40 Hangeul letters, how letters are combined into syllables, and how to link sound together when speaking Korean. Free downloadable audio files are provided to help develop better pronunciation. Throughout the book, there are "time-out" sections that serve as a short study break. These sections contain cultural tidbits and facts related to Korean, including "Abbreviations in Korean Slang", "Chinese Characters in the Korean Language", "When Do Koreans Learn Hangeul?", and more. Following the extensive coverage of Hangeul is a section which covers Korean Handwriting. Over 300 examples of handwritten Korean, provided by native Koreans, are introduced with tips, explanations, translations, and practice exercises to help learners develop the ability to efficiently read handwritten Korean.

Máster Del Hangeul

Conviértete En Máster Del Hangeul

TalkToMeInKorean

¿Alguna vez has tenido problemas para leer los títulos de tus K-dramas favoritos a causa de la elaborada tipografía? ¿Algunas veces te preguntas qué es lo que dice un texto en coreano escrito a mano porque no entiendes todas las letras? ¿Quieres mejorar tus habilidades para leer y escribir Hangeul? Después de estudiar con este libro serás un ¡Máster del Hangeul! Abordamos de forma detallada todas las letras que componen el Hangeul y damos consejos para leer fácilmente coreano escrito a mano o en tipografía.

Este libro tiene todo lo esencial para ayudarte a aprender Hangeul, incluyendo la historia del Hangeul, la pronunciación y el orden de trazos de las 40 letras que componen el Hangeul, la combinación de las letras para formar sílabas, y la unión de los sonidos cuando se habla en coreano. El audio se puede descargar de forma gratuita para ayudar a mejorar la pronunciación. A lo largo del libro hay secciones tituladas “¿Sabías que...?” que sirven como un corto descanso del estudio. Estas secciones contienen notas culturales y hechos relacionados con Corea, incluyendo “Abreviaciones en coreano coloquial”, “Caracteres chinos en el idioma coreano”, “Los coreanos aprenden Hangeul a una edad muy temprana” y más. Con una extensa cobertura del Hangeul la sección titulada “Hangeul escrito a mano” contiene más de 300 ejemplos de coreano escrito a mano por coreanos nativos, presentados con consejos, explicaciones, traducciones y ejercicios de práctica para ayudar a los estudiantes a desarrollar la habilidad de leer coreano escrito a mano de forma eficiente.

Korean Catholicism and Protestantism: A Sourcebook

Nam-lin Hur

Christianity, one of the major religions in Korea, is indispensable for comprehending the complex contours of Korea's modern history. This sourcebook offers a convenient window for readers who are interested in a trajectory of Korean Christianity from its introduction to the present. It contains 62 documents on Catholicism and 64 documents on Protestantism. As a rare collection of original communiqués, letters, statements, firsthand accounts, and comments that span from 1883 to 2013, this sourcebook will surely help readers understand, through the inner voice, how Christianity has adapted itself to, influenced upon, and benefited from, the changing conditions of modern Korea. An essential reading of Korean Christianity!

The South Korean Democratization Movement: A Sourcebook

Namhee Lee

With the publication of *The South Korean Democratization Movement: A Sourcebook*, readers of English can now access in a single volume the rich and compelling voices of the people in South Korea who dedicated their lives to the democratization movement. Many have served prison terms, and some even perished in the process. Spanning more than three decades from the early 1960s to the late 1980s, the democratization movement was responsible for toppling the country's authoritarian regime and ushering in a parliamentary democracy in 1987. The movement also produced an impressive array of documents and sources, which include manifestos that were read out loud before a demonstration; newsletters printed and circulated underground; pamphlets scattered on university campuses or on streets for a few seconds before a protest leader was apprehended and forcibly taken to a police station; statements of appeal to judges, which were smuggled out of prison and transcribed and circulated underground; letters written to family members while in prison; and poems, among other writings. Of the thousands of these kinds of documents, 55 have been selected and translated for *The Sourcebook*, almost all of which are available in English for the first time.

Kaesong Double Entry Bookkeeping (KDEB) in a Global Perspective Volume I

Seong Ho Jun

These two volumes represent a great contribution for a better understanding of the development of double-entry bookkeeping as a traditional accounting method used in East Asia. The chapters that follow compare the perspectives of scholars from South Korea, China, Japan, and Europe who argue that the economic history of East Asia can contribute to unveiling an aspect of modernity focusing on their use of double-entry bookkeeping, so far neglected by mainstream scholars.

The Federal Accountant Australia in 1917 remained epilogues "Who first thought of bookkeeping as a business method?" One would never think of Korea, and yet it was there that Double-Entry Bookkeeping (DEB) was invented and put into use. This was in the twelfth century, while it was not until the fifteenth century that a similar system was devised in Venice, then the commercial centre of the world. *Kaesong Double Entry Bookkeeping(KDEB) in a Global Perspective* brings new insight to one of the debatable questions of global history: "Why did globally developed DEB, despite surprising divergence between the West advanced areas and the East?"

Kaesŏng Double Entry Bookkeeping (KDEB) in a Global Perspective Volume II

Seong Ho Jun

As Kaesŏng Double Entry Bookkeeping(KDEB) in a Global Perspective shows, similarities between these two parts of the world were very high in the pursuit of rational profits as well as living standards. Perhaps most surprisingly, this volume demonstrates that the Kaesŏng Korea was the highest accounting practice for profit seeking among the three East Asian states.

The History of Education in Korea: A Sourcebook

Gilsang Lee

The series “*A Sourcebook*” organizes and provides primary data sorted by subjects and areas on the understanding of and research into modern Korean society and culture in an attempt to meet academic interest on the foreign study of Korea in its rapid achievements of industrialization, democratization, and social change.

South Korea’s educational development has been often held up as one of the world’s most impressive success stories. Today South Korea is among the highest ranking countries in most comparative measures of education. Yet, at every stage of its development, South Korea’s educational policies were subjected to criticism and often contentious debate. This book will help clarify contributing to a better understanding of South Korea’s educational development.

Koryŏsa chŏryo II

Essentials of Koryŏ History

Edward J. Shultz

The Koryŏsa chŏryo (Essentials of Koryŏ History) is one of the most important historical records of the Koryŏ kingdom (918-1392). Presented in 1452 and compiled under the leadership of Kim Chongsŏ and 28 men, it appeared one year after the publication of the *Koryŏsa (History of Koryŏ)*. Compressed to 35 books, this is an abridged version of the *Koryŏsa*. The *Koryŏsa chŏryo* offers a chronological presentation of the events of the Koryŏ kingdom. As each year unfolds, the *Koryŏsa chŏryo* captures the spirit and feeling of Koryŏ, recording the triumphs and trials of the dynasty. This history describes the actions of the kings, the life of the court and its aristocrats, abbreviated biographies of noteworthy individuals, changes to Koryŏ's social and political institutions, foreign contacts, as well as natural events as floods, famines, and earthquakes. This volume covers the years from 1147 to 1259.

An Ally and Empire

Two Myths of South Korea-United States Relations,
 1945-1980

Tae Gyun Park

U.S.-South Korea relations have a special significance for scholars in Korea because of the special role the United States has played in the history of Korea since 1945. For Korea, particularly for South Korea, the United States was not just something that exerted its influence from the outside because the United States has been an agent that has shaped the history of South Korea from the inside in just about every aspect. While the Republic of Korea was formally an independent country, it was not so in substance. In particular, the United States held on to operational control of the South Korean military forces. The fact that an independent nation released the power to control its own military forces to another nation holds a special meaning. Of course, the only party to problematize this fact was North Korea-most South Koreans never questioned it.

The Koguryo Annals of the Samguk Sagi

Edward J. Shultz

Samguk Sagi (History of the Three Kingdoms) is a history book of 50 volumes of which Bongi, or Main Texts, is regarded as particularly important because it contains records of main historical events arranged in a chronological order including the myths around the foundation, rise and fall of the three early Korean kingdoms, Goguryeo, Baekje and Silla, and the succession of their rulers. The book was compiled by a Goryeo scholar-statesman Kim Bu-sik in 1154, and is regarded as one of the most important source material for the study of the ancient Korean history. As Korea's earliest remaining history book compiled under the patronage of the state, the book had set a good example for the history books that followed it. The Main Texts consist of the history of Silla from 57 BCE to 936, which is the longest and most complex part of the book, Goguryeo from 37 BCE to 668, and Baekje 18 BCE to 660, which is the shortest of the three texts. Translation of the *Samguk Sagi* into English, or in fact any foreign language, has long been regarded as a daunting work because translator(s) would require systematic knowledge of Korean history and culture in addition to expert command of English, Korean and Chinese.

The Silla Annals of the Samguk Sagi

Edward J. Shultz

This book, *The Silla Annals of the Samguk Sagi*, is a translation of the Main Text (Bongi) of *Silla in the Samguk Sagi (History of the Three Kingdoms)* by Professor Edward J. Shultz in The University of Hawaii, a widely admired specialist in the ancient Korean history. The book is based on The Revised and Enlarged Edition of *The History of the Three Kingdoms* which began to be published in 2010, and hence reflects the results of the latest in-depth researches. It is expected to provide valuable resources for overseas researchers seeking to expand the scope of their study on ancient Korean history.

Understanding Korean History

Okkyoung Baek

A complete understanding of Korea requires broad knowledge of Korea's history. There has been a sharp increase in the number of foreign researchers who take an interest in Korea and want to learn about Korea's history. *Understanding Korean History*, Ewha's Korean Studies Series for Globalization 3, is an introduction to the history of Korea for beginners written by Korea's prominent scholars.

This book was written after ascertaining, through the KCRI's active exchange with major universities overseas, the level of background knowledge of prospective readers and their academic inquiry. Accordingly, by providing recent studies and varied views, this book will help readers to easily and systematically understand the development of Korea's history and gain overall knowledge about Korea's past and present. This introductory book also offers a great opportunity for its readers to take further interest in various aspects of Korea beyond its history.

Syngman Rhee

The Prison Years of a Yong Radical

Chong-sik Lee

This short book is an original work of considerable importance for a number of reasons. First, it sheds new light on Syngman Rhee's early years as a radical activist: the way he became a rable-rouser against the decrepit Choson dynasty and the reasons he ended up spending many years in prison. Second, it details for the first time many aspects of Rhee's years in prison, including the process of his conversion to Christianity and his energetic activities. It is a fascinating story based on materials in Chinese, English, Japanese, and Korean. Thrid, the author raises many important and provocative questions pertaining to modern Korean history.

To note just a few: What were the possibilities and limitations of the reformist moverment of the late 19th century? Did the Korean kingdom really have a change to survive? Why did Rhee and others, who had such favorable view of Japan, become such confirmed enemies of Japan? Why was the United States so indifferent to Korea when the Koreans desperately sought her help? The readers will find the author's discussions and answers illuminating. These issues, one should note, are directly relevant to the understanding of Korea's foreign relations today. I dare say that no one interested in modern Korean history could afford not to read this book.

Letters from Korean History (Box set)

Eun bong Park

Letters from Korean History has been a great success in its native country among young Korean readers. This translation version will now be of help to ethnic Koreans overseas, others interested in Korea or history in general, and Koreans looking to study history and English at the same time. Progressing from the stones and bones of prehistory all the way to the turbulent twentieth century in the course of five volumes, *Letters from Korean History* can be browsed as a reference text or plowed through from beginning to end. As with most histories that cover such a long period, the density of information increases as the narrative approaches the present. With plenty of photos and illustrations, readers are able to acquire a vivid sense of history.

Myeangsim Bogam

A precious Mirror of Bright Mind

Heejae Lee

'Myeangsim Bogam: The Precious Mirror of Bright Mind' has sold steadily in Korea for decades. With all the change that Korea has witnessed in the past century, what makes this one book such a successful seller over the years in Korea?

Going back to the sixteenth century, Korea has suffered from invasions by Japan and the Ching Chinese. These invasions influenced Korean leaders ideologically causing schisms and in-fighting within Korea itself. To recover from strife caused by foreign invaders and domestic political confusion, average Korean needed to regain their peaceful mind. Myeangsim Bogam emerged to provide relief from this strife and share universal wisdom to guide human relations and balance one's mind. Myeangsim Bogam does this by combining accepted Taoist ideas as well as Confucian manners.

While originally published centuries ago, *Myeangsim Bogam* became especially endeared to Koreans and enjoyed a resurgence in publication in the modern age during the Japanese Occupation. Koreans have taken comfort from this book—nowadays, as well as the recent and ancient past. This book is as much beloved by Korean people today as it was in the past.

The Spirit of Korean Development

The Art & Science of Marketing in Asia

Sang-young Rhyu

There has been much debate surrounding analysis of the economic success and political transformation of Korea. However, the interest of this book does not lie in the tangible factors fueling development. What is puzzling to non-Koreans is the intangible factor that enabled tangible factors to work together and thereby enable for Korean development. In other words, what we are seeking here is an explanation for Korea's miraculous development within the spirit of Korea. Korea is neither unique nor diverse from an economic perspective... This book divides Korea's developmental trajectory into four stages: economic growth, democratization, informatization, and smart power, and analyzes how these four aspects formed a virtuous cycle and advanced. Within the four stages of development, three factors related to the spiritual content of historical development were examined: the historical memory of poverty, cultural genomes for democracy and human rights, and nomadic dynamism. The book introduces seven success stories that emerged alongside the success of the spirit of Korean development: Saemaul Undong, POSCO, the Gold Collecting Movement, Hyundai, democratization, Samsung, and Hallyu (Korean Wave). In order to trace an intangible spiritual and cultural impetus, this book introduces many words from major leaders as well as politico-economic anecdotes and historical incidents.

The Sunshine Policy

In Defense of Engagement as a Path to Peace in Korea

Chung In Moon

Persuasion is better than force. This central belief behind the late South Korean President Kim Dae-Jung's unprecedented policy of engagement with North Korea became a key that promised to unlock half a century of conflict and provocation between North and South Korea. Kim's Sunshine Policy argued that encouraging North Korea to come out of isolation and end confrontation was better than trying to force it to change. This came to define a generation in South Korean politics, allowing millions to dare to believe that half a century of war could be brought to an end. Now, this new book by Chung-in Moon, a Yonsei University professor and former South Korean government adviser, presents a definitive analysis of how Kim developed and implemented his revolutionary policy, the challenges it faced, and the mistake that Lee Myung-bak's government has made in abandoning it. Moon was a first-hand witness to the events of the Kim years, assisting in drafting the Sunshine Policy, attending the historic inter-Korean Summits in 2000 and 2007 that were fruits of its labors, and chronicling the public, political, and global support for the policy. He argues forcefully that critics of the policy in recent years are wrong to dismiss it as a failed appeasement experiment that was too generous to North Korea. Instead, he sees it as a victim of circumstance, hampered especially by the hardline policies of US President George W. Bush and anxieties over global terrorism. Even so, he explains, it did more to normalize North Korea in the world's eyes than any attempt before or since. With tensions and uncertainty between the Koreas at a new high in the first months of Kim Jong Un's regime, the policy and its principles are more sorely needed than ever.

Korean Popular Beliefs

Yong Bhum Yi

There are shamans, known as mudang in Korean, who serve as priests in shamanic ceremonies, and the number of shamans never becomes smaller. Today, many people still resort to shamanist rituals known as kut in Korean to settle their problems. Family beliefs or village beliefs have gradually been weakening, but Korean popular beliefs still have their place, in shamanism, in divination, and in geomancy, adapting to changes of the times. In other words, popular beliefs are still part of the meaningful world of the Koreans even now, influencing their judgment and behavior when they are in trouble. From this viewpoint, this book intends to demonstrate the general aspects of Korean popular beliefs and also shed light on their historical changes and present conditions.

Korean popular beliefs do not remain separated from Korean lives or other religions such as Buddhism, Confucianism, and Christianity, but are related to them. Considering such aspects of Korean popular beliefs, this book focuses on the correlation between Korean popular beliefs and other religions, between Korean popular beliefs and the lives of the Koreans, and between types of Korean popular beliefs rather than each type of Korean popular beliefs in isolation. This way, the book aims to identify the status and meaning that Korean religious beliefs have in Korean lives and culture.

Won-Buddhism

The Birth of Korean Buddhism

Joon-sik Choi

This book is about new Korean Buddhism called "Won Buddhism," which was created by a religious genius named Chungbin Park (Sot'aesan) in 1916. Park innovated traditional Buddhism in the following various ways. First, Won Buddhists do not worship Buddha statues any longer, but instead enshrine circle (Il-Won-Sang) as a symbol of the Truth. That is why this Buddhism is called Won Buddhism ('won' means circle in Korean). Second, celibacy system of traditional Buddhism is no longer valid in this Buddhism, but it should be noted that only male ministers can marry, but no female ministers! Third, we can find many Won Buddhist temples in the cities, whereas traditional Buddhist temples are located in deep mountains. The fourth characteristic of Won Buddhism is that canons of this Buddhism are written in easy modern Korean, while those of the traditional Buddhism are mainly in difficult classical Chinese. This book may be remembered as the first easy introductory book in English on Won Buddhism.

Korean Women: A Sourcebook

Keong-il Kim

Korean Women: A Sourcebook offers a comprehensive introduction to the history of Korean women from the late nineteenth century to the 1990s. It brings together key source materials that reflect the dynamic and turbulent history of women in modern and contemporary Korea. The content of the volume provides readers with knowledge about the broader historical and sociocultural forces as well as women's own agency that created the options available to women at various points in Korea's modern history. The wide range of source materials ultimately demonstrates the crucial role women played in shaping contemporary Korean society within the context of colonial rule, the war, economic and political transformations and cultural innovations.

The Korean Diaspora: A Sourcebook

In-jin Yoon

This book is a collection of articles and other original content on the history and current state of the Korean diaspora. It is designed to provide useful information and references to researchers and readers with interests in the Korean diaspora as a phenomenon of migration and settlement of Koreans abroad. Despite increasing interests in the Korean diaspora, there have been few books written in English that can provide comprehensive and current information on the topic. To address this gap, this book aims to provide international researchers with basic and general information on the Korean diaspora.

This book comprises articles and references that examine the processes of the formation of the Korean community abroad, life experiences of overseas Koreans, and patterns of their transnational networking between the homeland and host countries. The book is organized into four parts. The first consists of two articles that examine the overall history and characteristics of the Korean diaspora. The second introduces the top 40 issues and topics relevant to the study of the Korean diaspora. The third part includes 9 articles that report on the formation of overseas Korean communities and their current situations. The fourth chapter introduces 3 articles that review government policies of both South and North Koreans overseas. We wish this book be a useful reference for those who want to have a comprehensive understanding of the Korean diaspora.

Environmental Movements in Korea: A Sourcebook

Sun-jin Yun, Riley E. Dunlap

This volume provides a comprehensive overview of environmentalism in Korea by focusing on the key problems and issues that have generated various strands of citizen activism on behalf of environmental protection. It traces the rise of environmental degradation from Korea's rapid post-war industrialization up to the present, carefully documenting various eras of activism over a changing and broadening range of problems: industrial pollution, major development projects, nuclear power and most recently climate change. For each era the major problems and controversies generating citizen activism are identified and carefully described, with detailed time lines, identification of key actors, documentation of campaign materials and governmental responses, and detailed presentations of press releases and other statements by these actors. The result is an invaluable sourcebook on the evolution of environmental degradation in Korea, the emergence of the citizens' movements that arose to combat them, and the current status of Korea's multi-faceted and continually evolving Environmental Movement. It will be useful to scholars, activists, officials and interested citizens.

The Korean Wave: A Sourcebook

Yun Mi Hwang

This volume consists of three main sections. Part 1, “Institutional Contexts,” draws on documents that encapsulate the rationale and strategies behind the Korean government’s promotion of Hallyu. Part 2, “Industrial Operations,” covers four sectors within Hallyu that have arguably drawn the most attention: television, film, music, and celebrity. Part 3, “International Reception,” treats the presence and peculiarities of Hallyu in seven regions around the world (China, Japan, Southeast Asia, the Americas, Europe, Central Asia, and the Middle East), as seen from a Korean perspective.

Modern Korean Family: A Sourcebook

Ki-soo Eun

The series “*A Sourcebook*” organizes and provides primary data sorted by subjects and areas on the understanding of and research into modern Korean society and culture in an attempt to meet academic interest on the foreign study of Korea in its rapid achievements of industrialization, democratization, and social change.

Modern Korean Family: A Sourcebook is designed to be the most basic reference book for researchers, both within and outside of Korea, who are pursuing research on subjects related to the Korean Family. It should serve as an essential reference tool both for non-Korean researchers who are unfamiliar with issues related to the Korean Family and for any researcher having difficulties accessing resources related to the Korean Family, which are unfortunately only available in the Korean language.

Modern Korean Labor: A Sourcebook

Hagen Koo

This book is a compilation of data sources on the subject of Korean labor, which were originally written in Korean but have been translated into English. The purpose of the book is to provide essential data sources for researchers and students inside and outside of Korea who are interested in Korea's labor history, labor politics, and culture. The book consists of seven chapters, covering the following seven periods: (1) 1920–1945 (Japanese Colonialism); (2) 1945–1950 (post-Liberation); (3) 1950s (the Korean War and post-war restoration); (4) 1960s (initial economic development); (5) 1970s (industrialization and the emergence of the democratic labor movement); (6) 1980s (democratization and intensifying labor struggles); and (7) 1990s (neoliberalism and the labor crisis). Each period is characterized by its unique labor policies, organizations, labor conflicts, and workers' culture, and these themes have been used as subchapters to organize the referenced sources in an orderly fashion within each chapter.

Understanding Contemporary Korean Culture

Joon-sik Choi

The Korea Culture Research Institute (KCRI) at Ewha Womans University is proud to announce the publication of Ewha's Korea Studies Series for Globalization, a comprehensive set of textbooks on Korean language, culture, history and arts that can deliver academic, yet realistic information about Korea to domestic and foreign college level students in and out of Korea, as well as Koreans living abroad.

Understanding Contemporary Korean Culture, Ewha's Korea Studies Series for Globalization 2 explores the cultural phenomena in Korea that have resulted from dramatic economic growth and rapid change in society over a short period of time. This book covers various aspects of Korean culture including Korea's daily culture by focusing on food, clothing and shelter, the characteristics of the modern Korean family and the status of women, the religious pluralism of Korea, Korea's 20th Century Popular Culture originating from the Korean Wave Hallyu, and the current situation of divided Korea.

Sports, Leisure, And Games in Korea: A Sourcebook

Seung Jae Lee

Since Culin's pioneering work on the leisure activities published in 1895, a century has passed. However, more than half of the leisure activities mentioned in Culin remains only in text.

The rapid industrialization experienced by the Korean peninsula in the last decades may have devaluated or endangered traditional Korean leisure activities, which this book aims to renew. As the largest collection of Korean leisure activities, this book includes 33 leisure activities that are deemed the most traditional and representative, highlighting their physical and metaphysical values, and is hoped to serve as the cornerstone for contemporary scholars as a source book for traditional Korean leisure activities.
